

PAINT PROTECTION FILM (PPF) WARRANTY

CARE & MAINTENANCE

- Wait for 72 hours after installation before cleaning your vehicle.
- Wash your vehicle frequently.
- Handwash with soap and water or regular car shampoo.
- If you do use a high-pressure washer to clean your vehicle, you should keep the nozzle at least 50cm from film edges in order to prevent lifting. Set washer jet to a wide spray.
- Treat your PPF with a flexible ceramic coating. Alternatively apply a non-abrasive wax twice yearly to maintain optimal gloss.
- Over time, and in extreme conditions, dirt may gather on the PPF surface. In such a situation it is recommended that the vehicle be returned to the installation centre for a gentle polish. This will lift the dirt and return the gloss.
- Remove bird droppings and other contaminants as soon as they appear.
- Remove dirt or wax build-up along the edges by using alcohol and a lint-free cloth.
